LED STRIP LIGHT ACCESSORIES

INTRODUCTION

Synerji LED Strip light Connectors are designed for seamless, reliable connections between LED strip light sections, ensuring efficient power transfer and consistent illumination. Made from high-quality polycarbonate with copper contact surfaces, these connectors offer excellent durability, heat resistance, and fire-retardant protection. Their transparent casing provides a neat, discreet finish, while the design supports easy installation and a secure fit.

STRAIGHT CONNECTOR DC COB IP20 INCL. WIRE 14cm

SYSTRCON03

Rated Current: 5.5A

Rated Voltage (III/2): 0-36V

Size of Wire: 14cm

Number of Pins: 2,

Contact Spacing: 5.5mm

Colour: Transparent

Contact Surface: Copper (Cu)

Casing Material: Polycarbonate (PC)

Operating Temperature: -10°C~45°C

Temperature Resistance: Rubber Shell up to 105°C

Fire Retardant Rating Complies With UL-94-V0

Conductor Cross-Section: 0.5 mm 2AWG20#

Insulation Outer Diameter OD: <1.6~1.8mm

Compatible LED Strip Light specifications: 8 mm wide, bare-board, single-colour LED strips

Suitable for COB light strips with more than 240 LED per meter.

Designed for flexible PCB strips (not suitable for wire board), **Compatible PCB thickness** 0.25mm~ 0.35mm

Accessories For COB-420P-8mm-IP20

Compatible LED Strip Lights: SYSTRCOB01 / SYSTRCOB02 / SYSTRCOB03

To be installed by a qualified electrician.
