LED STRIP LIGHT ACCESSORIES

INTRODUCTION

Synerji LED Strip light Connectors are designed for seamless, reliable connections between LED strip light sections, ensuring efficient power transfer and consistent illumination. Made from high-quality polycarbonate with copper contact surfaces, these connectors offer excellent durability, heat resistance, and fire-retardant protection. Their transparent casing provides a neat, discreet finish, while the design supports easy installation and a secure fit.

COB IP65 FRONT CONNECTOR INCL.

SYSTRCON04

Rated Current: AWG206A Max, AWG22 4A Max

Rated Voltage: 5V/9V/12V/18V/24V/36V/48V

Pressure Resistance: 500V

Temperature Resistance: 80°

Operating Temperature: -20°~ +80°

Salt Spray Test: Neutral Salt Spray 24H

Permissible Humidity: 15%~90%

Material: High-quality plastic

Application:

Suitable for bare-board LED strips or COB LED strips with adaptive pin pitch

Accessories For COB-8mm-IP65

Compatible LED Strip Lights: SYSTRCOB04 / SYSTRCOB05 / SYSTRCOB06

To prevent connector discoloration, please follow these guidelines:

Temperature & Humidity

High temperature and humidity may cause discoloration. Store in a controlled environment where both are managed.

Moisture Protection

The material easily absorbs moisture, and sudden temperature changes in humid conditions can affect color. Store in a dry, ventilated place, away from direct sunlight.
