## LED STRIP LIGHT ACCESSORIES

### INTRODUCTION

Synerji's Plastic End Caps are the perfect finishing touch for your LED strip light installations. Made from high-quality, durable plastic, they provide a seamless fit while protecting the exposed ends of your strips from dust, moisture, and damage.

With their transparent design, these end caps deliver a clean, modern, and professional finish, making them ideal for residential, commercial, and decorative applications.

## END CAP FOR AC COB STRIP LIGHT IP65

### SYSTREND03

**Materials:** Transparent silicone or polycarbonate

**Compatible Sizes:** 10–12 mm PCB strips;

**Dimensions:** ~12 mm inner width × 4 mm (h); ~14–16 mm outer width × 6–8 mm (h)

**Installation Method:** Slide-on, sealed with silicone adhesive; optional curing time (~24 h)

**Operating Temperature:** Approx. -20 °C to +40/60 °C depending on material

**Ingress Protection:** Designed for IP65–IP68 rated strips; maintains moisture seal

### Benefits:

- Protects LED strips from dust and wear
- Neat & professional finish
- Easy to install – just slide on!
