LED STRIP LIGHT ACCESSORIES

INTRODUCTION

Synerji End Cap for COB LED Strip lights IP65 is a simple yet essential accessory designed to seal and protect the exposed ends of your LED strip light installations. Made from durable white plastic, it helps maintain the strip's IP65 water-resistant rating, ensuring reliable performance in damp or dusty environments. Ideal for clean finishes and added protection, this end cap is a must-have for both indoor and semi-outdoor lighting setups.

END CAP FOR COB STRIP LIGHT - IP65

SYSTREND01

Material: High-quality plastic

Colour: White

Compatibility: Designed for 8mm or 10mm wide COB LED strips (480 chips per meter)

IP Rating: IP65 – Protects against dust and low-pressure water jets

Dimensions: Typically fits the width of the strip (e.g. 10mm internal width)

Installation: Push-fit or glue-in with silicone sealant for waterproofing

Use Case: Seals the cut ends of LED strips to maintain water resistance and prevent short circuits

Benefits:

- Protects LED strips from dust and wear
- Neat & professional finish
- Easy to install – just slide on!

Accessories For COB-420P-8mm-IP65

Compatible LED Strip Lights: SYSTRCOB04/ SYSTRCOB05/ SYSTRCOB06
