LED STRIP LIGHT ACCESSORIES

INTRODUCTION

The Synerji LED Strip Light Middle Connector offers a quick and reliable way to join two RGB LED strip segments without soldering. Designed for 4-pin 10mm strips, its transparent casing and secure metal prongs ensure a stable connection, making it ideal for clean, professional lighting setups or DIY projects. Built for durability and ease of use, it helps maintain consistent power and signal flow across your LED installation.

MIDDLE CONNECTOR FOR HV COB STRIP LIGHT

SYSTRCONM01

Material: Transparent plastic casing.

Pins: 4 metal prongs (2 on each side), designed to align with the copper pads on standard LED strips.
